The Government of India has introduced the e-clearance and Afterlife Remains (eCARE) Portal, accessible at <https://ecare.mohfw.gov.in>, to enhance and accelerate the process of repatriating deceased individuals or human remains to India. This digital platform is designed to simplify the logistics and regulatory requirements involved in transporting bodies from abroad, ensuring a more efficient and respectful handling of such sensitive matters. For the Indian community residing in Brunei Darussalam, it is strongly recommended to familiarize themselves with the eCARE Portal in advance. By doing so, individuals will be better prepared to navigate the system swiftly should any unforeseen circumstances arise, thereby facilitating a smoother and less stressful process during challenging times. This proactive approach helps in avoiding potential delays and ensures that necessary arrangements can be made promptly when needed.
